EDUCATION

Techno Main SaltLake — B.Tech in Computer Science & Engineering

CGPA: 8.0/10 | Expected Graduation: 2028 | Kolkata, India

Relevant Coursework: Design and Analysis of Algorithms, Data Structures, Object-Oriented Programming, Database Management Systems

TECHNICAL SKILLS

Languages: C, Python, JavaScript, TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Vite, Tailwind CSS, Node.js, Chart.js, Leaflet, React Router

Backend & Databases: Supabase (Auth, PostgreSQL, Realtime), MongoDB, REST APIs

Tools & Platforms: Git, GitHub, Figma

PROJECTS

KisaanSetu — Farmer Procurement & Queue Management Platform

React, Vite, Tailwind CSS, React Router, Supabase (Auth, PostgreSQL, Realtime) — Built for Smart India Hackathon (SIH 26032)

- Built a real-time procurement and queue management platform with separate role-based dashboards for farmers, procurement centers, and administrators.
- Designed a booking/queue system with capacity handling and live status tracking, letting farmers see real-time queue position and estimated wait via Supabase Realtime.
- Implemented cascading State → District → Block/Panchayat location selection to route farmers to the correct procurement center.
- Secured multi-role data access using Supabase Auth and Row-Level Security (RLS) policies.

LogiFlow — Smart Supply Chain & Route Optimization System

React, Tailwind CSS, Leaflet, Vite

- Built a logistics route optimization platform implementing Dijkstra's algorithm for shortest-path routing and Kruskal's algorithm for minimum spanning tree computation.
- Designed an interactive dashboard with live graph visualization and step-by-step algorithm trace tables using Leaflet, enabling users to visually track route optimization in real time.
- Crafted a polished marketing landing page with a scroll-driven canvas animation and a custom teal/cream/charcoal brand identity.

Panchakarma — Smart Therapy Booking & Patient Management System

React, TypeScript, Vite, Node.js, MongoDB, Chart.js

- Developed a multi-role patient management platform for a holistic health service with distinct dashboards for patients, therapists, and administrators.
- Implemented automatic therapy scheduling logic to streamline appointment booking and reduce manual coordination.
- Integrated Chart.js to visualize patient progress and therapy analytics for practitioners.

ACHIEVEMENTS & CERTIFICATIONS

- Ranked in the Top 45 out of 300+ teams in the internal Smart India Hackathon (SIH 26032) round for KisaanSetu.
- Own "Hack-Your-Way," a hackathon conducted under the Institution's Innovation Council (IIC).
- IBM: Python for Data Science — Certification.

EXTRACURRICULAR & LEADERSHIP

- Member, KALAKRITI (Graphics Design Wing) — SAMARTH Club, Techno Main SaltLake.
